★ LIST OF

PEONIAS

SEASON 1907-8

C. BETSCHER,

CANAL DOVER, OHIO, U. S. A.

THE PEONY stands at the forefront of all garden flowers. When its merits and economic value is properly known it will be one of the most demandable of all plants. In many ways it excels the rose. Its surety, majestiveness, ease of culture, freedom from disease, make for its popularity. Many wonder why we are so enthusiastic over peonies. When they see our fields, the appreciation of perfection, they speak for themselves in eloquence, language, beauty or in a decisiveness no human can equal. Our fields during the blooming season were a paradise of beauty, perfume and achievement. It shows that the peony will make its way to a more popular favor than ever. The one thing that hurts the Peony is the inferior sorts sold for up-to-date sorts.

We sold a large number of dozens to local buyers at \$12.00 to \$18.00 per dozen for small plants showing one that finer peonies can be sold when or where properly brought to notice. The ease and certainty of results in growing peonies as compared with the roses and many other subjects, with a greater degree of results is forcing the Peony to the front. Our country is big, the demand can be made greater.

Our stock was bloomed out this season so that we had a better chance to see the merit of various sorts, make comparisons, selections for further increase-

ments, while some are disappointing, not what they are advertised as being. On the whole we are well satisfied and will forge forward in harmony with our observations and experiences.

Many growers and specialists (?) stocks are badly off, needing further correcting. I give my personal attention during their blooming and digging periods, so know definitely on these points.

There is no grower whose stock is all positively true to name, we know this from experiences in buying. We received Andre Lauris for more than six novelties. Many novelties are old sorts renamed, one from abroad has sent six different sorts for a well advertised novelty. American novelties are the equal of European extra extras altho far too many are duplications of older sorts. While our list embraces about 1200 sorts, we have selected out what proves to be the 100 very best ones for incrementation as fast as we can work up stock, until such time we will offer those having decided merit that can be supplied in liberal lots, some of the older sorts will not be superceded for a long time.

From a critical florists standpoint for cut flowers, the list of free taking colors are somewhat limited. Great care should be exercised in this matter. Give Peonias liberal cultivation and fertilizer for real results, do not pass judgement on your Peonias until fully established, many sorts are fickle until fully established.

We can ship from September to May—early fall is the preferable time.

We cellar a limited stock of the more popular sorts for spring sales.

## Singles

We have a very fine list of singles that we offer at the uniform price of 50c each \$5. per doz. \$40. per 100  
 10 sorts 50c each \$3. per doz. \$20 per 100

## Imperials

We have a fine list of these including Kelway's and other growers' latest novelties. Our stock is limited but we can offer a few of each sort at \$1.50 each.

## Species

Our list of species is nearly complete. Can offer all but Browni.

Lutea (Delaveyi) rich dandelion yellow, dark blotch at base of petals \$25 each.

Corsica, rosy purple, \$5 each.

We will have a large stock of pinks, reds, whites and mixed to offer for Fall delivery. Write us.

I can put up fine collections, my choice of sorts, (customers wishes followed as closely as possible,) at \$3 to \$12 per dozen and up. In ten of a sort at \$10 per 100 and up. Special rates on large quantities.

Any sort not listed supplied in a limited way.

The prices above are for 2-6 eye divisions or 1 year plants, at prices for single plants we select largest plants. Many sorts we can supply in 1-2-3-4-5 year clumps at relative rates.

We guarantee all of our peonias to be true to name. Every grower has some sorts under wrong names. Where there is any doubt we do not list them.

Remember we have the largest list of varieties, giving us all the best ones, the largest stock of peonias in the world--an important fact.

In addition to Peonias we grow large quantities of Gladioli, Cannas, Iris, Phlox, Hemerocallis, Dahlias, etc. We aim to have the same high standard of excellence as our Peonias. All these items will pay florists if the right sorts are grown. When Iris and Hemerocallis are in bloom for May 30th they pay very well.

A word about our Gladioli—Our stocks of these are beyond doubt as fine as can be had world wide. One hears much about "The Best" etc, etc. We have bought or inspected stock from all growers but little of that has merited retention in our stocks.

Much stock is produced from the most ordinary seed, the very finest handpollenated seed as a rule is quite common-place.

Last season we showed our stock longside the finest in America. Critical growers admitted the superiority of ours.

We have very large stocks of Augusta, May, etc. It will not pay florists to plant low priced mixed stock.

We are situated in Central-Eastern Ohio, equidistant from Pittsburg-Columbus-Cleveland. Our place is easily of access, as we have Penna. Lines, B. & O. and excellent trolley lines to Canton and Dennison landing a few blocks from our place.

**Our terms are cash, or where satisfactory references are given 60 days for large accounts.**
